

Solar carports built to stand the test of time.

— ABOUT US

Pioneers in the Solar Carport Industry

Solar Source has been at the forefront of innovation since our inception in 1984. We built the first solar carports in Florida, as well as the first solar powered EV stations. We also founded the first licensed and accredited solar training school in the Southeast USA.

— TURNKEY EPC PROVIDER

Engineer. Procure. Construct.

Solar Source is a one-stop turnkey contractor. We are licensed General, Solar, Electric, and Roofing Contractors. We hold all applicable licenses required for work we perform. We self-perform rooftop, ground mounts, carports, energy storage, and specialty projects.

Our commercial resume includes public utilities, theme parks, museums, zoos, military bases, universities, government facilities, convention centers, and more. We have all the resources in-house to make your project a success. Additionally, we can access our vast network of professionals trained through Solar Source Institute.

Illuminate Your Parking Area and Go Beyond with our Solar Carports

Canopy Lighting, Electric Car Charging, Integration into Parking Garage, Customizable Finishes, Durable Design for High-Winds, Surveillance Camera Integration, Rainwater Management, Versatile Design Options.

CUSTOM

Solar Source is among the top contractors in N. America. From Canada to Cuba, from New Jersey to New Mexico, we have projects of all shapes and sizes in a wide variety of locations.

Improve your bottom line through environmental stewardship.

LEGOLAND, FLORIDA

THE BENEFITS

Maximize Profits. Minimize Costs.

Upgrade your parking lot and go green with our Solar Carports, designed to reduce energy costs, protect vehicles, increase property value, and reflect your organization's commitment to environmental stewardship.

- These innovative structures provide shaded parking for your vehicles while the solar panels on top convert the Sun's energy into electricity.
- Investing in a solar carport solution is a smart financial decision. In addition to the energy, there are tax credits, accelerated depreciation, non-profit direct pay and project-specific bonuses.
- Covered parking can be a revenue generator. Some businesses can charge a premium to park under shaded solar canopies.

Design & Engineering

Our in-house Professional Engineering and Design team provides value based engineering & custom designs.
